

## LAB-3

Subrat Singh  
IBM 1815094

- 1) Creating a multiple router topology by connecting router through serial ports & PC's through fast ethernet
- 2) assigning IP addresses
- 3) pinging PC1 from PC0 gives destination port unavailable
- 4) use 'show IP route' then add static addresses using  
ip route < dest > < subnet > < next hop >
- 5) ping PC1 to PC0 or vice versa
